RAELIANS IN ACTION.

Don't miss the 66 Happiness Academy Tour, starting in Las Vegas March 24,

Happiness is the main reason behind everything and should be so.

RAEL, February 66 aH

MAITREYA'S WORDS

NEW REVELATIONS, FEBRUARY 19TH

We are Raelian. What is it to be Raelian?

We love science, technology and we love love and harmony, meditation, and above all, happiness.

Everything else is not important, only happiness is important. Why do science, if it doesn't bring happiness?

Why meditate if it doesn't bring happiness?

Everything we do has only one reason: making us happy. Every other excuse or reason, is, sorry for my bad English: "bullshit".

Happiness is the main reason behind everything and should be so.

Why are we alive? why did the Elohim create us? Because they were happy doing it. Why were we born, each one of us individually? Because your father and mother were happy doing it.

Not one father and mother have sex thinking they have to because it is their job and it is boring. They do it because they are happy to do it.

So, happiness is the reason for everything alive on earth. Why is the flower blooming? To have sex. The flowers are the sex of the plants. So blooming is about happiness and pleasure.

Why do birds sing? They are saying "This is my territory, females please come!" Why is everything alive moving? for happiness and pleasure. We are the fruit of the happiness of the Elohim.

So we may think that it is important to study, many people think that studying is very important and that it will bring happiness. It's not true.

We are coming close to a time where we won't need to study.

Studying doesn't bring happiness, it's 'bullshit' of education.

Learning is not happiness, being is happiness.

So people study and the men are so proud of it that they say and they think that through science they understand everything in the universe.

It is not true.

We will never be able to understand everything. Our knowledge, even with the most advanced

science, is very limited and will always be very limited. The more we learn, the more we know that we know nothing.

Only stupid little scientists claim "we know many things, we are full of knowledge". Only the stupid scientists say so.

The top scientists, the ones at highest level say : "we know nothing". And the more they learn, the more they realize that we know nothing. What is the ultimate knowledge? Is it infinity? Can we understand infinity ? We cannot understand infinity.

We will never be able to understand infinity but we can feel it, we can enjoy it, we can be happy.

Trying to understand it will always make you sad, depressed, anxious.

Don't try to understand infinity, just feel it.

Feel it in the flower, in the field, in the bird, in you. Feel it.

You are part of infinity.

If we do more and more powerful studies on the infinitely small, use more and more powerful computers, then we have the illusion of understanding the infinitely small.

We found the atoms and said that "this is the smallest part". In Greek 'atomos' means something which is small and cannot be cut in two or three or ten.

Then the scientists discovered that atoms are made of smaller particles, but they continue to use the word atoms, which is very funny.

They use the word atoms which means something which cannot be divided in smaller part, even after they discovered that there are electrons, protons, much smaller particles inside the atom.

And they say "we discover".

Now they search again and they discover smaller parts, quarks, smaller and smaller particles, and they will always find smaller particles, because there is no end in infinity.

So why study it? It is not interesting.

We think the Elohim are so advanced in technology they must have very advanced research.

They don't .

When they reached a certain level of knowledge, which we are very close to reaching as well, they stopped their research.

In the same way they don't travel in space anymore.

They travel a little bit, but when you realize that the universe is infinite, why keep traveling?

Since it is infinite, better to be happy where you are.

So here are two big revelations today....Revelation, to reveal, to announce.

Two revelations.

First revelation: the Elohim don't continue to progress scientifically.

Second revelation: the Elohim don't travel in space anymore.

Because they know it is not necessary.

When you reach a certain level of science, then you realize it is totally worthless to study and that what is important is to be happy.

Happiness doesn't come from studying and research. Our science and knowledge will always be limited. But what is important in this limited knowledge is to be happy, to be, to feel, because happiness is infinite and immediate.

It doesn't need research, it doesn't need studying.

Don't think that after more seminars you will be happier, no!

If you discover what real happiness is, it's right now, immediately. Not tomorrow, not after studying for 10 years the Messages and coming to seminars. If you really really discover what happiness is, being a Buddha, it's right now.

If you are a Buddha right now, after 10 years you will not be a better Buddha.

When you are a Buddha, you are at the top. You cannot go higher,

But the good news is that you can do it right now, by feeling, infinity, power, energy, happiness, right now! And you will never be better, if you reach this level.

In the same way that you can go up, you can go down, you can stop being a Buddha.

If you stop feeling, if you stop being, you can go down.

The state of being a Buddha and being happy is not forever. You need to constantly use the consciousness to feel, to be.

You cannot be better but you can be worse.

It's like climbing on a tree. You climb on the tree and there is wind. Life is a wind, and what is difficult is to stay at the top. You cannot go higher because when you reach the top of the tree, there is no higher branch, you cannot climb higher. But you have to use consciousness to stay at the top forever in the wind of life.

So, remember that studying is worthless. There is no progress in consciousness, it's immediate.

The more you study, the more you think happiness will come from studying, the worse you will

feel.

That's why Jesus was saying "happy are those who are not very intelligent".

Being intelligent doesn't bring happiness. In fact, being intelligent is stupid.

The percentage of people with high diploma who try to kill themselves, who are depressed, using anti-depressants is much higher than among uneducated people.

Because studying doesn't bring happiness. It brings the illusion of knowledge.

Do you know who are the most depressed people and committing suicide? Scientists.

Especially doctors, medical doctors.

Because medical doctors know they cannot do everything they want.

They cannot cure cancer and every day people come with cancer and they say, they don't cure cancer.

They cure a very limited number of people and I'm not sure they cure them, most of the time they kill them, with radiation, chemotherapy, poison.

So they are very depressed with a lot of knowledge which doesn't bring happiness.

Happiness has nothing to do with studying.

Think about it.

It's immediate, right now, no need to study, no need of anything outside yourself.

No need of anybody, you just need to be.

The world is sick of intelligence.

There is a culture of intelligence, and what is the result of intelligence?

Fukushima.

Very intelligent people studying nuclear energy and making nuclear power plants and killing everything.

Very intelligent people governing America and sending a bomb on Hiroshima.

Very intelligent!

Very intelligent people thinking that "communism is a great idea"; very intelligent people, and you have the communism nightmare of China.

Very intelligent people thinking that "capitalism is great" and all the planet is becoming destroyed by capitalism.

All this is thinking: very intelligent and very dangerous. One more time, that's why Jesus said "happy are those with a simple mind". It doesn't mean to be stupid, it means to be. To be, to stop thinking.

Thinking only brings drama and devastation on earth.

We have a lot of military people in Okinawa from America. Why are they here? they have nothing to do here. They are in Korea also. The Americans are everywhere, why? Because there are very intelligent people in Washington who want to dominate the world. The American empire.

They don't care about bombing people for their good. They kill people everywhere "to bring peace" !

They go and kill people in Libya "to bring peace", they say that it's to bring peace and love.

Now they will maybe attack Iran and Syria "to bring peace". They will send bombs.

Wow, a lot of 'peace', thank you very much, I don't need this peace.

This is no army, no military.

Every time you see and think wait a minute "I love this planet", you don't want to be in the military. Every idea brings war. Communism, capitalism bring war, any ideology brings war.

Every ideology, even the religions. Muslims, Jews, fighting. Stupid!

It's not love.

But the Christians think "we fight for our religion", what kind of religion pushes people to kill other people? Muslims think "we must kill in the name of Allah". Wow! What kind of god is that.

And the Jewish people are killing the Palestinians, in the name of god!

Ideas, intelligence, they create suffering.

Study, they study the bible for 20-40 years and they say : "go to war".

So studying makes you stupid, don't study anything.

Just feel love.

That's why you don't need to study, you just need to feel love, immediately.

If all the planet stops to be intelligent, maybe we need a huge world government of stupid people who think only about being, about happiness, and the world would be a much better place.

So we are sick of intelligent people, having ideas, thinking and killing people in the name of ideology, of ideas.

When you think, you become stupid.

Don't think, just feel, be.

I look at the eyes, and I feel a human being.

Start between you, because even the Raelians, sometimes, they look at each other and say "are you intelligent" ?

"Look, I am very intelligent". Stop that.

Look at the other people with love. Don't care about if they are intelligent or not, care about whether they are happy.

Am I happy to see this human being in front of me?

Is he or she intelligent ? I don't care.

Warm, love, one feeling of human being in front of me.

I don't care if they are a doctor or a scientist, I don't care.

Each human being who is full of love, who is a Buddha, is much more important than the best scientists of the world. Yahweh, the leader of the Elohim, created life on earth, to create happiness.

Of course we need a little bit of science to be able to manage our immediate environment.

To slowly reach a level where computers can do everything, everything scientific.

On the Elohim's planet, there are no scientists anymore.

All the work, all the research, all that is necessary is made by computers.

And the Elohim don't study! Why do you want to study when you know everything at your level?

When we know how to cure diseases, - soon this is coming through genetic science, cloning-, when we know how to cure diseases, through natural ways, when we know how to manage the earth into a paradise, when we can soon destroy money, then why study?

Then you start to feel happy naturally.

Then we can reach eternal life because science and research are limited, and when you start to realize it's limited then you discover that happiness is the only thing unlimited.

Happiness, consciousness, feeling, being.

So, yes, we love intelligence. Real intelligence is not what human beings call intelligence.

Someone who sees a flower and gives water to the flower, is much more intelligent than a nuclear scientist.

A simple mind who sees children suffering and gives food to the children, is much more intelligent than top scientists.

And that's what is to be afraid of intelligence.

Because intelligence, ideas, thinking, are right now destroying the earth.

This is the result of science and technology, because it's exploited without consciousness.

So we have to go back to being and consciousness, and love.

Then a little bit of science, a little, but not too much. Because remember, soon, within 20 to 30 years, we will have discovered everything we need to know.

Like the Elohim we will not need to know more.

When the Elohim discovered the point we will reach within 20 to 30 years, where thanks to the acceleration of computer science and technology we will reach a level where we know everything we need to know. When they reached that point, they stopped, because there is no purpose to continuing research and discovery when you have enough to manage your own level of civilization.

Of course we are very primitive, so we think that we need to make scientific research forever, and that we will travel everywhere in the infinity of the universe.

We don't.

When you reach a high level of technology, which is very soon, you stop and start to work on what is more important, not on the knowledge, but on the happiness of the people of the earth.

Until there is no one who is not happy. That's what you do. And not traveling like a tourist in space in every direction, but being happy right here.

Because happiness is not somewhere else but it's right here, on this little blue planet, exactly where you are, that's where happiness is.

Imagine, in the infinitely small in your hand, there are very small planets, with very small human beings, in your hand, not one but an infinite number, and they reach our level of science at their level, and they start to travel in space, so they explore one finger, and then the other finger, that takes a lot of travel, a lot of science, another finger, and then they realize, this is not a universe there is a hand, and a body, wow.

Maybe they will explore the hand, maybe the whole body, go to the foot. It is the same everywhere.

There are many other universes, many many also, so what is the purpose of traveling, what is the purpose of exploring? Then they realize that they'd better stay here, go back to the center of the hand, and realize that they don't need exploring. We don't need discovering, we just need to be happy at our level, right now, and they stop scientific research and they stop traveling in the universe.

And they start to have a beautiful life, with a planet full of Buddhas. On the Eternal life planet of the Elohim, everybody is a Buddha and this is real knowledge.

Imagine. Imagine the earth with 7 billion Buddhas.

You can go in the street, you can go everywhere and everybody is happy.

Everybody has enough food, everybody is.

Everybody is.

That's heaven and we can do it.

And to reach this level, we must stop worshiping intelligence, and education and knowledge, which is necessary, a little bit, like salt in the rice.

But it is not the most important thing, the most important thing is being instantly a Buddha.

I know it's very fashionable to have instant soup, powder for instant soup, instant soya drink, instant coffee. Instant Buddha is better.

And that is my teaching, right now, right here, become immediately a Buddha.

Don't think it will come after studying, don't think it will come after I finish speaking, it's right now.

Climb the tree, and stay at the top, in the wind of life.

I love you.

NEVER BECOME AN ADULT

Your love is so beautiful, so pure, all of you. I feel the purity of your love.

That's a common thing amongst all the Raelians everywhere in the world.

The Raelians are the most pure people on the Earth.

The Raelians kept this shining mind that many adult people lost and which is so important.

It's very important, never become an adult. Adults are stupid.

And you can see that they are stupid, crazy, because they

are serious. Serious people forget to be a child, not the Raelians.

Try to be a child in your mind forever.

Try to be seven years old, laughing, with a little hair like that, for ever.

Because there is no need to become an adult. Why become an adult? ... and serious?

Everything around you tries to make you old, specially the politicians, the law, money, banks, media, they all try to make you serious.

Don't listen to them, they are wrong.

They are the ones responsible for Fukushima, they are the ones responsible for Hiroshima, bombs, war, starving people, and enslaving people, with the credit you pay to the bank.

This is not a real human being.

Real human beings are forever seven year old, laughing, kidding, smiling, making jokes, and having fun. Remember that, never be serious.

Maybe some new Raelians will come to see me and they want to see a serious Prophet.

If I were serious I would not be a Prophet.

All real messengers and prophets are laughing, making jokes, kidding.

Because they are 7 years old for ever.

You cannot teach people to be 7 years old if you are not yourself 7 years old.

My beard can be white, I may be losing my hair, but inside, I am still 7 years old.

My body may be 65, but inside here, still 7.

And here still 16... for ever, thanks to the Elohim.

Thanks to their teaching, you stay 7 years old forever.

Thanks to meditation and the Message of the Elohim.

Whatever your age is, you can be 7 years old forever.

And thanks to the good teaching of Elohim, no drugs, no alcohol, no tobacco, you can be 16 years old here forever also.

I was so surprised recently to see that 50% of men in some cities, 50% of 30 year old men, have no more erection. Wow... Why?

Because they use drugs, alcohol, tobacco, and that it's scientifically proven that it affects erection.

So thanks to the Elohim, you can age and still have a beautiful sexual life.

7 years old forever, 16 years old forever, what a beautiful life. Thank you Elohim.

THE MESSAGE OF ELOHIM IS A KEY TO HAPPINESS

January 22nd

I feel that you are happy to be here and I want you to feel your own happiness.

Sometimes we are happy but we don't feel it, so we think we are not happy, because we forget to feel our own happiness.

Ask yourself "are you happy right now"? Not yesterday, not tomorrow, not one hour before, not one hour after, just right now, are you happy right now? Do you know that? Even when you feel a little bit down or if you have sometime a little bit of a concern or something, just ask yourself : "how do I feel right now" ?

Suddenly happiness comes back, because happiness disappears when we think about the past, or the future.

Regret of the past "ah it was so good before, I was young, I had money", bla bla bla, "now I don't have, I am old", so sad.

And then fear of future, if you are young, even if you are very young you can think "ah I will become old" ah terrible, "I will have a white beard like Maitreya and wear my hair like him" and then you are full of fear.

But happiness is when you think of right now, without any regret of the past, without any fear of the future. The past is dead, you cannot change it, you cannot live it again, it's finished, dead. As for the future, we don't know, it may never exist, it's possible that today is the last day of our life. It's possible.

For everybody, you never know when your heart will stop.

Maybe in 1 hour, in 1 minute, so if this is the last minute of your life, imagine, do you want to live it with fear or with happiness?

In any case, we will die, maybe tomorrow, maybe in 10 years, it doesn't matter.

Live today as if it is the last day of your life.

If it is the last day of your life, are you happy to be here? Ask yourself!

If it is the last day of my life, there is no other place in the world where I would like to live, better than here and now. With you, with your smile, with your eyes full of love. Feel the privilege and the luck we have to be alive right here, right now.

And make every day like that, one day at a time, when you take life like that, life becomes so beautiful. Live everyday of your life like it is the last day.

Then, all the colors become more beautiful because it's the color of the last day of your life.

All the smiles of the people around you become more beautiful because it's the smiling faces of the last day of your life.

All the trees, all the flowers, the rain, become all the last of your life, instead of say "ah raining day" "wow beautiful, this rain is so beautiful".

These clouds, maybe these are the last clouds I see on this planet.

And everything becomes beautiful, when you become aware, have the consciousness of everyday being the last day of your life.

That's how, guided by the consciousness of Elohim, we can have, forever, a very happy life.

Because the Elohim are guiding us.

The Message of the Elohim is a key to happiness, a path to happiness, which starts right now by living each minute like it is the last of your life.

I wish you will apply this teaching every minute of everyday.

Then, you will have a beautiful life and what is a beautiful life? a happy life.

Then you can have eternal life with the Elohim because the Elohim love you they don't want you to suffer forever.

If you are not happy, you don't deserve eternal life. Its the complete opposite of the Catholic teaching.

According to the Catholic teaching, if you suffer a lot, if you are sad , then after death you will deserve eternal life. And forever you will be sad! Wow, terrible.

No, the Elohim say "be happy, if you want to have eternal life because we love you too much to give you eternal life if you are not happy".

Because when you are recreated on the Elohim planet, you are recreated with the same brain, the same mind. They would be very sadistic if they were saying " this person is very depressed, very suffering, let's recreate her so he or she can suffer forever".

If you are sad and depressed, when you die, you go back to dust, no more pain.

But if you are happy, then you deserve an eternal life of happiness.

All the Eternals on the Elohim planet are happy. Not because they have money! There is no money.

Not because they have special talents, not because they have a lot of diplomas from universities, because there is no diploma on the Elohim planet, so why are they happy?

Happy each minute like it is the last one.

When you live each minute, like it is the last one, an eternal life is not enough, you want to live forever. But if you are very depressed, then one minute is too much, that's why many people kill themselves, they commit suicide.

When you cannot bear even one more minute of life, then you kill yourself.

But eternal life is the opposite, you are so happy right now that you want it to continue forever. So remember, your happiness is a key, the essential key for eternal life, and it's very good, it's full of love from the Elohim, they will give you eternity only if you are happy.

And how to be happy ?

By being happy right now, not yesterday, not next minute, right now.

And that's what I wanted to start, if possible, right now. I wish you a beautiful day.

I wish you a beautiful minute.

I wish you a beautiful second.

And then you have an eternal life.

DESTROY EVERY GOAL, TARGET, OBJECTIVE

February 5

Just a few words about happiness.

You were born happy. Everybody is born happy, all of you were born happy.

But sometimes, not sometimes, most of the time, life, education, family, school, society, destroy this natural happiness.

And thanks to the Messages and the teachings of the Elohim, we discover that we can be back to this

happiness, natural happiness, because the laughing little baby that you were a long time ago is still alive inside of you.

It's time to be back to this baby and if you do it, happiness is immediately back. Immediately.

Of course it's good to do many seminars, to learn, but the real happiness is right here, right now, not tomorrow.

In other words you can all be immediately a Buddha, immediately. Right here, right now.

Maybe for the first time of your life.

It doesn't need training, it doesn't need learning, just being.

When a baby is born, he is perfectly happy.

He didn't study, didn't go to school, doesn't know how to write, nothing, but he is happy.

But men, women, the more they earn, the less happiness they have.

So it's very important to destroy this myth, a very very bad myth, the myth that we need goals, targets, objectives. This is poison.

When we need goals or objectives or targets, it's saying that in the future, we will reach something.

It is the same for happiness. "I'm not happy now but one day I will be happy". This is very stupid : it is right now or never.

If we say "I will be happy tomorrow", it will never come.

Like in the famous American song "it's now or never".

Every time you have goals or objectives, you create problems in your life.

It can be through money ; "I am not happy right now but when I will have one million dollars I will be happy."

Never. It never happens.

"I am not happy but when I will have a beautiful boyfriend or a beautiful girlfriend, I will be happy."

It never happens.

It's right now. Right here.

Destroy every goal, every objective, every plan.

This is true for sex, for money and also for philosophy: "I am not happy now but when the Elohim will come I will be happy". This is very stupid.

I'm happy now.

So, do we have a target, an objective, a goal to build the embassy? Yes, but it doesn't bring us happiness, happiness is now, and our whole life is a succession of now.

Every second is a new now. Every day is a new now.

And by a succession of now, we have a beautiful life.

But never say "tomorrow I will be happy" because if you say tomorrow, happiness will never come.

Happiness can only exist right now, not one minute later. "I will listen to Maitreya speaking this morning and after I will be happy". No!

"I am not happy but in one second I will be happy." No! Be Happy right now.

Do you feel it? Are you happy right now ?

Breathe the first happy breath of your life and keep it forever.

I wish you a beautiful day.

NEWS AND VIEWS

16-YEAR-OLD SAILS AROUND THE GLOBE BY HERSELF

After 518 days and 27,000 nautical miles, 16-year-old Laura Dekker has shown the Dutch authorities that she could sail around the globe by herself.

Laura Dekker appears to be the youngest girl to officially sail alone for that long. She was 14 when she began her voyage in Gibraltar. She would have started at the age of 13 if the Dutch authorities hadn't fought her decision. In 2009, she was put under state care for two months as her parents refused to prevent her from undertaking the voyage.

Maitreya Rael commented on the "*stupid politicians and bureaucrats who tried to stop people realizing their dream.*":

"Nothing and nobody can stop you when you really want to do it! The same totally retarded politicians and bureaucrats fight against the people who are escaping the boring, violent and poisoned world they created, by using drugs. But when some great teenagers give to the young generation a wonderful example of dreams, courage and adventure, they try to stop them! They should instead encourage them."

He also said that *“he hopes a Hollywood producer will realize a movie about her adventure and that it will make the politicians who tried to stop her, look as they really are: retarded, stupid, and full of hatred for youth. “They should publicly apologize to her, create a Foundation supporting young adventurers and name her the official leader!”*

GUIANA AND FALKLANDS

France still ‘owns’ a large piece of land in South America, Guiana, where the Native South American tribes are slowly disappearing while they have never been granted the right to land that North America did to their natives (although partial).

While the French President was campaigning there, Maitreya declared: *“shame on France to keep the last European colonial territory in America. The time has come for independence and for giving it back to the native people with huge money payments in damages for the years of illegal occupation.”*

A few days later he also commented on the Falklands islands still ‘owned’ by UK:

“Like France in Guiana, the British Empire has no reasons, except colonialism, to keep such a remote island, which belongs without any doubt to the South American native people. What would the British do if Jersey, for example, had been “discovered” by some Argentinian sailors 500 years ago who had created a “settlement” and which would then be an Argentinian territory right in front of England?”

ABOUT LYBIA

A recent poll by Oxford University showed that only 16% of the Lybian population is in favor of democracy. A majority wishes to have a strong power in place. For the past few weeks, Libyans have demonstrated in front of the headquarters of the ruling National Transitional Council (NTC) in Tripoli to demand better work and living conditions and compensation for those affected during last year’s events.

Maitreya Rael made the following comment:

“Now that NATO “humanitarian” criminal attacks are finished, I would not be surprised to see Kaddhafi’s supporters take the power back, and NATO, especially France, will then pay the price to have committed so many crimes against Humanity against Libyan civilians. Western peoples don’t realize that Arabic people never forget what has been done to them and will, them or their children, make the aggressors pay the price for what they have done. If it is not through violent means it will be through oil embargoes. Like in the case of Iran, India, China, and all other Asian countries will buy any oil that is denied to Western powers, with also a right sense of revenge as they too, have been in the past brutally invaded and controlled by Western colonization.”

RAEL IN SUPPORT OF CLOSING US BASES IN OKINAWA

Maitreya Rael has expressed his support to the Japanese delegation in Washington, DC., opposing the presence and new construction of US military bases in Okinawa.

34 US bases have occupied much of the Okinawa land for the past 67 years. A majority of the Okinawaians have opposed, year after year, the forced occupation of their land by the US, organizing regular peaceful sittings and protests.

For Maitreya Rael, the fear used by America to justify all these bases and the building of more weapons is not only irrational but criminal and the 70 military bases in Japan are totally unjustifiable.

“Moreover, no independent organization has ever verified the US claims that there are no nuclear weapons stored in Japan” stated Maitreya. “The IAEA should at least conduct an inspection to make sure that there are none.”

RAEL ENCOURAGES THE ‘WONDERFUL’ POPULATION DECREASE

A recent study published by the Japanese Ministry of Health predicts a decrease of the Japanese population by about 30% within the next 50 years. The news was largely commented as negative by most media.

Maitreya commented:

“The media and politicians should instead talk about the “wonderful population decrease. All those who tried to stop the decrease of population in any way, including the media commenting negatively about it, should one day be prosecuted for crimes against humanity for being accomplice to the terrible overpopulation to come”.

Maitreya has repeatedly condemned politicians and religious leaders for their selfish encouragement for people to have more babies. He has also requested that all religious books asking people to ‘multiply’ be declared illegal.

“It is my hope that more and more young people will refuse to have children in order to save humanity. NOT ONE of these irresponsible and criminal media even talked about the possibility to replace the young generations which may be required for a while to do some jobs by opening widely immigration and welcoming young generations from under-developed countries. This is racism and nationalism at its worse.”

“We are ONE planet and ONE humanity. It’s time to stop promoting making more babies and let people from poor countries populate rich countries while inciting the whole planet to use contraception.”

PAULO COELHO ON PIRATE BAY

Maitreya said:

“I fully support Pirate Bay, and this best selling author move. I myself ask all those reading my books -which they can download for free on our website www.rael.org- to share them with as many people as they wish. Copyrights are just a thing of the past trying to maintain devastating capitalism and suppressing freedom.

ABOUT CNN ARTICLE “IS EUROPE SETTING UP CLASH BETWEEN MUSLIMS AND THE WEST?”

Maitreya recommended this article:

http://edition.cnn.com/2012/02/03/opinion/ayooob-clash-muslims-and-west/index.html?hpt=hp_c1

saying that it is finally a great article by a top news site.

Maitreya selected for us the ‘most important (and true) parts’ :

“Most Western discussions of the Iranian bomb do not make even passing reference to the well-documented Israeli nuclear capability... Many ask why disputing European massacres of non-European people is not criminalized -- such as the French actions in Algeria... These would include the near-total extermination of native populations by European settlers in Australia, New Zealand, and North America.

They would include the killings of millions of people by the Belgian administration of the Congo Free State, whose population was halved during the early decades of Belgian rule. Most pertinent of all, Muslims ask, why not criminalize the denial of the genocidal Spanish Inquisition that led to the extermination, expulsion or conversion of the entire Muslim and Jewish populations of the Iberian peninsula?”

ABOUT SYRIA

While the UK, USA, France, Spain and Italy were asking their ambassadors to leave Damascus in early February, a Russian delegation headed by Foreign Minister Sergey Lavrov managed to get Syria's President Assad to agree to talks with the opposition and to follow the Arab League's roadmap, increasing the number of observers in the country, even in the most hostile areas in Syria.

Maitreya Rael expressed then his support to the ***“real diplomacy at works shown by Minister Lavrov which contrasts with the “Western bullying neo-colonialism disguised as ‘humanitarian intervention to save lives’, like what they did in Lybia where the NATO’s aggression killed 1000 times more innocent civilians (to protect them !) than those who may have been killed by the old power. It looks like Western countries have totally forgotten what diplomacy is and replaced it by***

bloody interventions and occupation to grab huge financial advantages. Non-violence is always better. We must never forget Gandhi!

More recently, the Syrian ‘rebels’ received the unexpected support of the Hamas, the Islamic militant group based in the Palestinian territory of Gaza and the West Bank which has received monetary and military support from the al-Assad regime for years. The Hamas has officially praised ‘the revolutions of the Arab Spring and saluted the sacrifices of the Syrian people’.

“This is a major problem for the mainstream manipulated western media” declared Rael.

“The Hamas, which the US and Europe consider as a “terrorist organization” now supports the Syrian”rebels”. Their titles should be :” The US and NATO are now partners with the terrorist organization Hamas in their support of the Syrian “rebels””.

“Of course they cannot write that. Instead, they focus on the fact that the Hamas breaks with the Syrian government. But the fact remains that NATO powers are now on the same side as Hamas. Being partners with a “terrorist” organization, should make them terrorists also. Anyway, they have been terrorizing the world for such a long time that it’s no surprise.”

RAEL DENOUNCES CENSORSHIP ON JEWISH FANATICISM

“Why would Western media always criticize the fate of Muslim women but never the one of Jewish women?” asked Rael, spiritual leader of the Raelian Movement, after the publication of Deborah Feldman’s book “Unorthodox”.

Deborah Feldman describes how she grew up in an ultra-conservative family in New York City, where she couldn’t read English books for they were impure. She had to cover her ankles and neck and hide being sexually assaulted as she had been taught that men’s lust was ungovernable. At 17, she was pushed into an arranged marriage and once married, had to shave her head and wear a wig.

“Why do we only hear stories about Muslim extremists and not about these extreme Jewish fundamentalism?” said Rael, ***“Isn’t it another proof that the media are controlled by Jewish people who want everybody to hate the Muslims but don’t say anything wrong about Jewish traditions”.***

A Hasidic Jewish teenager from New York just pleaded guilty to assault, for setting a neighbor on fire because he wasn’t praying with the rest of the community.

“Burning someone because he doesn’t go to the synagogue anymore, isn’t it pure and mad fanaticism?” commented Rael. ***“If it was a fanatic Muslim, all media would have talked about it to incite anti-Muslim hatred. Since he is Jew, there is total silence in the mainstream media, whose owners are Jews in majority as we know well.”***

SILENT FAMINE PANDEMIC

A quarter of young children around the world are not getting enough nutrients to grow properly, and 300 die of malnutrition every hour, according to a new report that lays bare the effects of the global food crisis. There are 170 million children aged under five whose development has been stunted by malnutrition because of lack of food for them and their breastfeeding mothers, and the situation is getting significantly worse, according to research by the charity Save the Children. In Pakistan, Bangladesh, India, Peru and Nigeria – countries which are the home of half of the world's stunted children – recent rises in global food prices are forcing the parents of malnourished children to cut back on food and pull children out of school to work.

Maitreya commented:

All of this is happening while Western powers, mainly the USA and NATO waste billions of dollars in wars, occupations and military budgets under the false pretexts of “promoting freedom and democracy”. If they had so many good intentions they would instead spend this money to give food to all the children of the world.

SCOTTISH INDEPENDENCE

Regarding the Referendum about independence planned in Scotland next year, Maitreya made the following comment:

“All empires have to be dismantled and replaced by human size areas or independent provinces federated in a world government. This applies not only to the British Empire, but also to the USA, China, Russia etc....Huge empires generate weapons of human annihilation, and their centralized power disconnected from human reality destroys freedom and human rights for the benefit of capitalist vultures in a new world fascism.”

A PROPOS DE LA STRUCTURE DU MOUVEMENT RAE LIEN

A structure member has expressed his wish to receive a lower level in the structure as he is aging and feels that he doesn't have the same energy he used to have to accomplish the requested tasks.

Maitreya answered back saying: *“A structure cannot ask to receive a lower level. An old level 4 or level 5 Guide will stay level 4 or level 5 Guides until they die.*

They may however request to be temporary relieved from their local or organizational responsibilities if they feel tired because of their age or because of some disease until they are feeling better. They may also be relieved permanently from these responsibilities if they think they won't be able to recover from their incapacity, whether it is due to a disease or to aging. He or she will however keep his or her level until death.”

ANARCHY AND GENIOCRACY

PERSONAL REFLECTION TO TRY AND UNDERSTAND THE LINK BETWEEN THESE TWO SEEMINGLY CONTRADICTORY CONCEPTS.

By Daniel Chabot, Raelian level 5 Guide

Recently, Maitreya spoke about anarchy, i.e., of a world without any government, without any social pressure and where no one has power, but a world that would simply be governed by the people; a world without any police, but only governed by the natural law. Maitreya clearly explained the link between anarchy and geniocracy. However, some Raelians seem a bit confused or have difficulty harmonizing an anarchic world, without government, and a world governed by a Geniocratic world government, where geniuses would be in power. So let us, together, try to understand. I will not repeat all the ideas put forth by Maitreya, which I invite you to read carefully¹, but will limit myself to try and grasp as best I can the relationship between anarchy and Geniocracy. Therefore, what follows is only my personal reflection and does not necessarily represent Maitreya's vision.

In His speech, Maitreya uses the analogy between the ants' social organization and humanity's, by putting forth the absence of leaders (even the so-called queen has no power on the community and doesn't run anything, She is only there to lay eggs) and the importance that collaboration plays, where each ant works for the betterment of the community.

In the book Geniocracy – Government of the People, for the People, by the Genuises, Maitreya uses the analogy between the human body and humanity, where each cell and each organ does its work, and where the brain's specialized cells are the ones that govern, not the cells in the feet, the liver, or any other organ.

The first thing to grasp, in my view, whether we talk about a colony of ants or the human body, is that there exists, fundamentally, a predefined blueprint or plan by our Creators, the Elohim. Therefore, the entire organization that exists in the anthill, where each individual ant collaborates with the whole, was initially programmed by the Elohim. Nothing is random, nothing is chaotic, nothing is done without a reason and any action contributes to the good of the collectivity. But I say this again, there is an initial plan defined by the architects who created this living species. The same goes for the human body. It develops, organizes itself and then functions based on a program contained within the DNA. And, as we know, the same goes for the development of humanity on Earth². It is taking place according to a well-defined plan.

Let us continue with the human body analogy. Strictly speaking, there is no single cell or system that governs the functioning of the human body as a whole. Everything is programmed in the DNA and the carrying out of the plan is done "naturally." The cells reproduce and exert their functions wherever they are or migrate wherever they need to. Liver cells work inside and for the liver and the same goes for the cells of all organs of the human body. No cell, not even a brain cell, can tell other

cells how to do their work. A neuron cannot tell a liver cell when and how it should function. These are well-programmed and in synergy with the organism as a whole. They respond according to their operation plan, in other words, whether we talk about ants or cells in a human body they respond to a predetermined “natural law,” meaning by the Creators. When, as Raelians, we speak of natural law that manage the organization and functioning of a living entity, we know full well that this natural law was planned by the Elohim when they created that living organism. Whether the individual is highly intelligent or incredibly stupid and without conscience, his system still functions, in other words, his liver and pancreas do what they are supposed to do, his heart beats and pumps the blood from and to the entire body, the digestive system does its work, etc... All the body's organs developed, went where they were programmed to go, and performed their function and this, without having the brain dictate anything. However, if a person grows his consciousness and his intelligence, if he meditates and is in harmony with himself others and infinity, if he eats well and makes healthy choices for himself, everything will get better for sure. He will breathe better, his organs will take advantage of the judicious choices he will make, and his metabolism will function better. But his brain, and more specifically his neurons of consciousness, will not tell his liver or his pancreas when nor how they should do their work. But if, thanks to his consciousness and his life's choices, he is more in harmony, respectful, and full of love for himself, it is very likely that his organs will function much better. Consciousness plays no role in the pre-programmed tasks of the organism's cells, organs, and systems. Rather, these function according to the “natural law” of the living organisms' organization set forth by the Elohim. But consciousness can positively (or negatively) influence this functioning. It can have a systemic influence, by allowing and even stimulating the organism's good functioning and perhaps even the harmonious expression of DNA. However, if the life's choices and hygiene go against the “law of nature,” the entire organism will pay the price and then certain cells could somehow take charge of the entire organism. If a person intoxicates himself with drugs or other toxic substances, he could become dependent and his behaviors could be the result of this dependency. Dependency is when certain cells take control over the whole. The natural law governed by DNA is still there to ensure that cells and organs still do their work, but other cells take the reins to guide the organism's behaviors on the wrong path. And if we take this analogy a bit deeper and we imagine cells taking control over the organism's plan or blueprint, i.e., DNA, then it is no longer anarchy that is taking place, but chaos and the organism is doomed. This is essentially how cancer cells work. For this reason, it becomes highly desirable for the cells of consciousness in our brain to make enlightened decisions necessary to guide the behaviors, choices, and decisions of the entire cells and the organism. In short, the conscience that is just will make choices that are just and that are in agreement with the natural law of things.

If we now address the large body that we call “humanity,” it's exactly the same. Whether humanity was governed by brute force, monarchies, dictators, or stupid governments that only sought, and still seek power and money, and that sought and still seek personal interests through fraud and corruption, the large body called “humanity” has nonetheless developed according to a pre-programmed plan by the Elohim. Despite the imperfections and the stupid acts committed by governments that

sought to take power, humanity has organized itself well, great discoveries have been made, and systems have been put in place. Science and technology have developed naturally: physics, chemistry, biology, physiology, etc., have seen the light of day and from then on, systems that have contributed to the human cells of the large body called “humanity” were created: the agricultural industry, electricity, medicine, aviation, the transportation industry, the economy, social services, human rights, telecommunication, television, the Internet, etc... Many systems were put in place and have allowed the development of humanity in an extraordinary fashion. Even humanity’s nervous system, the Internet and everything that results from it, was born, internal communication networks were put in place and developed, and continue to do so, with more and more precision and efficiency. However, the development of humanity, according to the natural law, is increasingly disrupted, biased, and threatened by individuals and governments with evil intentions and badly managed. “Certain individuals (certain cells) have the power and money and want more,” explained Maitreya. “They want everybody else to be slaves: to work, pay taxes, obey, and have no freedom. That’s what they want. But for themselves they want freedom, money and power. They have everything they want through corruption.” Some intellectuals increasingly see this corruption of current leaders as a sort of cancer, and they are right. Cancer isn’t anarchy. Cancer is chaos¹.

And if things do not change quickly this chaos stands a great chance of leading humanity to its own self-destruction. But the most extraordinary, and I say this again, is that despite this chaos and all the unhealthy powers that are in place, humanity has managed to develop itself to this day and give us extraordinary things. All we need to do is treat this cancer, i.e., do our best to have other healthier cells replace these unhealthy cells. Not to seize power, but to guide humanity’s choices. Hence, it is appropriate to assume that in the developing body called “humanity,” specific self-regulating functions can repair and adjust the development process when it no longer develops properly or is subjected to abuse. It appears that throughout humanity’s history, this self-adjusting system has manifested itself, which could explain the fall of certain systems, the overthrow of certain powers, the decline of certain empires, etc... We can even see in the current crumbling of the economic system a kind of self-adjusting mechanism. Once again, we can make an analogy with the defense and repair systems of a living organism such as the human body.

This is where Geniocracy comes into play, i.e., the electing of geniuses to serve as leaders and to guide our society’s choices. And as indicated by Maitreya, these geniuses do not have power as it is currently understood. It’s a change of paradigm in our way of seeing the notion of power. In Geniocracy, geniuses and wise people “guide like all good guides do – like Buddhas or spiritual guides,” explained Maitreya. “The geniocratic system is organized in such a way that the leaders show the way. They tell people, “This is what we should do, if you all agree we should do this.” Maitreya adds that “It’s good to have a group of geniuses, intelligent people thinking together about what kind of future humanity can have and presenting ideas that people can accept or not. But no power, because power destroys freedom, creates violence, poverty, and hunger.”

In short, to come back to our analogy with the human body, Geniocracy is the conscience that

guides our choices on a healthy and benevolent path for the organism as a whole. They are cells that are, no more no less, at the service of the whole and that allow the “natural law,” predetermined in the initial plan of the Elohim, to follow its course in the development of our organism called “humanity.”

Through the abolishment of current governmental systems comes paradism: “A political system that is similar to communism but has no proletariat. Paradism is based on new technologies, such as robotics, genetic engineering and nanotechnologies. In a paradist system, robots, nanobots and computers replace the proletariat or workforce.”

And by harmonizing anarchy, Paradism and Geniocracy, we set the stage for the future development of our humanity, itself managed according to a natural law, i.e., according to humanity’s development plan created by the Elohim.

I don’t know if my vision of all of this is precise and if my understanding is good. But one thing for sure, by reflecting on everything that Maitreya brings us in terms of light for our humanity, by tackling His new teachings not as exclusive compared to those He brought before but, on the contrary, as inclusive, then everything takes a new and more complete, global, and richer meaning. Far too often, in our discussions, we hear someone say: “yes, but Maitreya said this recently and, therefore, it changes or replaces what he said before.” Certain detractors even see contradictions between what was said or written and what is brought forth today. But when we pay attention and read carefully, when we put all of this in perspective and take an inclusive rather than an exclusive approach, we have a better understanding that Maitreya never excludes past elements. Quite the contrary, He includes them. It is undoubtedly for this reason that when He brings forth new elements, He concludes by telling us: “I will stop here for now,” knowing full well that we will need time to assimilate it all and that later on, He will bring forth new teachings that will include the preceding ones and will complete them. He actually warns us that He cannot give us the information all at once because we would not understand and be confused. And He is right...

Thank you, Maitreya, for being incredibly patient with us.
